Professional Summary

Results-driven Computer Science undergraduate with strong fundamentals in Data Structures, Algorithms, OOPS, DBMS, OS, and SQL. Solved 450+ DSA problems and experienced in building web and data-driven applications using Java, Python, JavaScript, and React. Recognized with GeeksforGeeks Institute Rank 47 and hands-on industry exposure through internships.

Education

United College Of Engineering And Research, Prayagraj 2026
B.Tech in Computer Science(AIML) **CGPA: 7.98**

Ewing Christian Public Senior Secondary School, Prayagraj July 2022
Intermediate - CBSE **Percentage: 83.6**

Certification And Achievements

- **Master Problem Solver:** Successfully solved 450+ Data Structure and Algorithm problems across multiple platforms.
- **GeeksforGeeks** Institute Rank 47 for DSA excellence
- Certified in Data Structures and Algorithms with C++ – GeeksforGeeks
- **Java Programming Certification** with strong focus on OOPS
- Participant, **ICCCCM 2024 International Conference**

Experience

AIT Bangkok Aug 2024 – Sep 2024
Summer Intern *On-Site*

- Worked on EDA and machine learning workflows using Python.
- Collaborated in cross-functional teams on ML-based projects.
- Developed a Heart Attack Risk Prediction system using healthcare datasets.

Techoctanet Pvt Ltd. Feb 2024 – May 2024
Web Developer Intern *Remote*

- Trained in core front-end technologies, including HTML, CSS, JavaScript, and responsive design principles.
- Improved understanding of frontend architecture and client-side performance optimization.

Projects

StyleSync AI | *Python, LLMs, Streamlit.* Sep - Oct 2025

- Built a Generative AI application that analyzes historical LinkedIn posts of influencers and generates new posts matching their writing style, tone, language, and length.
- Developed an interactive Streamlit-based UI allowing users to customize content parameters.

Ele-Types | *HTML, CSS, JavaScript, React.js.* Aug - Nov 2024

- Developed a typing test application measuring WPM and accuracy with real-time feedback.
- Implemented animated UI features including progress bars, confetti effects, and dark mode.

Fraud Detection - GitHub | *Python, Pandas, NumPy, Scikit-Learn, PCA, Machine Learning* Aug - Nov 2024

- Cleaned and explored Enron dataset (143 samples, 20 features) performing missing value imputation and outlier detection
- Applied PCA for dimensionality reduction and evaluated 7 supervised learning algorithms using cross-validation.
- Model performance improved significantly through data preparation rather than algorithm complexity

Chest X-Ray Diagnosis with Deep Learning - GitHub | *Python, TensorFlow, Keras, GradCAM* Jan - Mar 2024

- Performed multi-label classification on Chest X-ray 8 dataset (108,948 images) for 14 pathology detection
- Applied weight normalization to address class imbalance in medical imaging data.
- Utilized GradCAM visualization for model interpretability and diagnostic region identification

Technical Skills

- **Programming Languages:** Java, Python, C++, JavaScript, SQL
- **Developer Tools:** Git, Visual Studio Code, Github, Jupyter Notebook.
- **Technologies:** React, LLMs, Web API, Rest API, Pandas, NumPy, Scikit-learn, EDA, Machine Learning Basics.
- **Core CS:** Data Structure and Algorithms, OOPS, DBMS, OS.
